

## **Jam Story Time – 260 Original Fairy Tales**

The **Jam Story Time, JST** series has been developed from scratch for English learners, who comprise 90% of the world's population, to learn as many words as possible within the limited volume of each sentence.

Exciting stories, fantastic illustrations and lively music are combined to fascinate learners while enabling them to unconsciously acquire new vocabulary. A total of 3,000 target words have been used to produce 260 stories.

English learners in Japan have difficulties due to the differences between the linguistic factors of English and Japanese. We have therefore collaborated with an American team who lent their expertise to create products that are universally accessible and educationally accurate, assuring that our products will be helpful to students of English no matter their national backgrounds.

Now contracted with the TBS Group, a division of Tokyo Broadcasting System, a major TV network in Japan, we have the great honor to have the JST series marketed around the globe to over 5,000 TV stations and broadcast outlets.

Features of TV programs:

- Length: 10 minutes (negotiable).
- Delivery of the first 13 episodes to cover 3 months; projected end of December.
- Local language translation; available upon request.
- Compensation for one-year license; negotiable.  
Challenging price for JST debut will be offered.

The following are the unique features of Jam Story Time:

A. Our products have been carefully developed to be universally acceptable. Any discrimination, religious or local factors have been carefully avoided.

B. All Jam Systems software has been developed so as not to depend on any specific kinds of hardware, telecommunication device or OS environment. This ensures for our product both a long life and the flexibility to cover digital formats and traditional publishing. From TV programs and videos to smartphone-ready applications, the JST series can be easily and quickly be accessed in a wide variety of ways.

**It is our humble wish that the JST series would last more than a century as an educational gift to future generations.**

C. Translations of content in the learners' mother languages of Japanese, Chinese, Arabic, Korean, Portuguese and Spanish have been included. Other major languages are coming soon.
